Zachary Trimble reviewed the judging criteria and shared the DME RIP Laboratory website for competition information and guidelines. Four teams are competing including team to optimize cracker and cookie cooling lines, team for redesigning an unmanned surface vessel for the purpose of future autonomous marine robotics research, team for designing an autonomous drone capable of completing tasks for the Student Unmanned Aerial System Competition, and team to design and develop a working prototype device capable of ultrasonically detecting underground conduits and cables. ASME judges are Douglas Dye, Richard Leclerc and Brianne Yamada, all from Hawaiian Electric Company. Competition results will be featured in the February 2022 Wiliki.
- Joint ASME-HI, FALEA and UHM COE FE Exam Prep Course: As reported previously, this FE exam is a computer-based exam administered year-round at NCEES-approved Pearson VUE test centers. The prep course will be opened to UHM students and for engineers needing a refresher. So far according to Dr. Woonchul Lee there are a few students interested. There has been no response from graduated engineers. The progress of this effort will be updated in future Wiliki issues.

On November 30, 2021, ASCE YMF held a virtual networking event with civil engineering students at UH Manoa, YMF members, and other industry professionals in the community. The 20 participants at this event did a series of one-on-one "meet and greet" sessions with 4 to 5 other participants. Student attendees were paired with either YMF members or industry professionals to learn more about each engineer's company, industry, and job responsibilities, and to have the opportunity to ask questions. We hope this event was beneficial to everyone and we hope to see you at our next networking event. Thank you to everyone who joined us!
